**Before Insert Operation** 

12. Insert data to a database table from user interface.

```
protected void Button2_Click(object sender, EventArgs e)
{
    String connectionString;
    SqlConnection con;
    connectionString = ConfigurationManager.ConnectionStrings["conStr"].ToString();
    con = new SqlConnection(connectionString);
    try
    {
        con.Open();
    }
    catch (Exception)
    {
        con.Close();
        return;
        throw;
    }
    String sqlstr = "Insert into Type(typeID,tName) values(" + TextBox5.Text + ",'" + TextBox6.Text + "')";
    try
    {
        SqlCommand exec = new SqlCommand(sqlstr, con);
        exec.ExecuteNonQuery();
        con.Close();
    }
    catch (Exception) { throw; }
}
```

13. Update operation from user interface.

**Before Update Operation** 

**After Update Operation** 

14. Update operation from user interface.

```
String connectionString;
SqlConnection con;
connectionString = ConfigurationManager.ConnectionStrings["conStr"].ToString();
con = new SqlConnection(connectionString);

try
{
    con.Open();
}
catch (Exception)
{
    con.Close();
    return;
    throw;
}
String sqlstr = "UPDATE Type SET tName='" + TextBox6.Text + "' WHERE typeID='" + TextBox5.Text + "'";

try
{
    SqlCommand exec = new SqlCommand(sqlstr, con);
    exec.ExecuteNonQuery();
    con.Close();
}
catch (Exception)
{
    throw;
}
```

## 15. Delete operation from user interface.

**Before Delete Operation** 

**After Delete Operation** 

## 16. Delete operation from user interface.

```
protected void Button5_Click(object sender, EventArgs e)
    String connectionString;
    SqlConnection con;
    connectionString = ConfigurationManager.ConnectionStrings["conStr"].ToString();
    con = new SqlConnection(connectionString);
    try
    {
        con.Open();
    catch (Exception)
       con.Close();
       return;
       throw;
    String sqlstr = "Delete from Type where typeID=" + TextBox5.Text + "";
    try
       SqlCommand exec = new SqlCommand(sqlstr, con);
        exec.ExecuteNonQuery();
       con.Close();
    catch (Exception)
        throw;
```
